Address: 17 Dartford Avenue, London, N9 8HG

E: yoonus.ahmed@outlook.com

M: 07904331346

Education

Queen Mary University of London

BSc Computer Science

1st Year - 80%

Sep 2024 - 2027

Kingsmead Sixth form

A-Level: Mathematics, Computer Science, Economics – Achieved AAB

Sep 2022 - 2024

- A-Level maths mentor
- Newsletter team member

Kingsmead School

GCSE: 11 8-5 grades including Mathematics (8), English Language (6)

Sep 2017 - 2022

- Involved in a reading scheme to primary school boys to help encourage boys to read more from a younger age

Experience

Credit Agricole CIB , Work Placement Programme

Jul 2022

- Experienced how an investment bank operates by visiting and talking to key departments such as Compliance, IT, Leverage Finance and Global Markets.
- Learnt about the software being used and developed by speaking to Quants, XVA traders and Software engineers on the trade floor, introducing me to risk technology.
- Collaborated with 3 peers to design and deliver a presentation to 10+ senior employees, summarizing insights from the program, specifically highlighting the IT department's role in enhancing operational efficiency.

Firs Lane Local Food and Wine - Cashier

Jul – Aug 2024

- Operated the till and served 70+ customers per shift in a fast-paced environment, having to adjust to each customer and ensuring they were served well and efficiently.
- Managed the shop floor ensuring it was constantly replenished and used stock knowledge to help customers locate specific items.
- Developed customer service skills which helped improve my confidence through the daily interactions I had with diverse customers.

Code Ninjas – Coding Tutor

Sep 2025

- Delivered hands on coding instructions to over 20 students guiding them through game development using languages and platforms such as Scratch and JavaScript.
- Served as a mentor and role model for young learners, inspiring curiosity and encouraging them to further explore into the world of technology.

Projects

Football pitch booking system

Apr 2024

- Designed and built an interactive pitch booking system using Python, SQLite and AppJar, allowing players to select sessions aligned with their play style, reducing booking conflicts completely.
- Applied a spiral development methodology to design and iterate multiple system prototypes, enabling in-depth evaluation and continuous improvement that led to a robust and fully operational solution that .

Strategy Back tester

Jul 2025

- Engineered a Python based backtesting framework for different trading strategies, leveraging yfinance API, Pandas and NumPy to simulate investments and calculate performance metrics across historical periods.

Voluntary Experience

Student Mentor

Feb – Apr 2023

- Volunteered as an A-Level maths mentor for other students in my cohort. This involved me explaining key concepts and going over exam questions.
- Developed leadership skills by guiding students through questions and clarifying misunderstandings and common mistakes made.
- Strengthened my organisational skills through preparing lesson materials for 2-3 students and managing their individual needs.

Sixth Form Newsletter Team Member

Sep – Dec 2023

- Wrote engaging articles for a monthly newsletter tailored to Sixth Form students, contributing fresh perspectives and relevant topics to boost readership by 6%.
